PraktiFin Eth&Gov

Student User Guide · Ethics and Governance in Finance

Self-marking practice for all seven chapters: **multiple-choice questions**, **case analysis** and **short essays** on a news article.

Open the app: fahmirahim0.github.io/praktifin/ethgov/

Works in any browser on a laptop, iPad or phone. No installation and no payment.

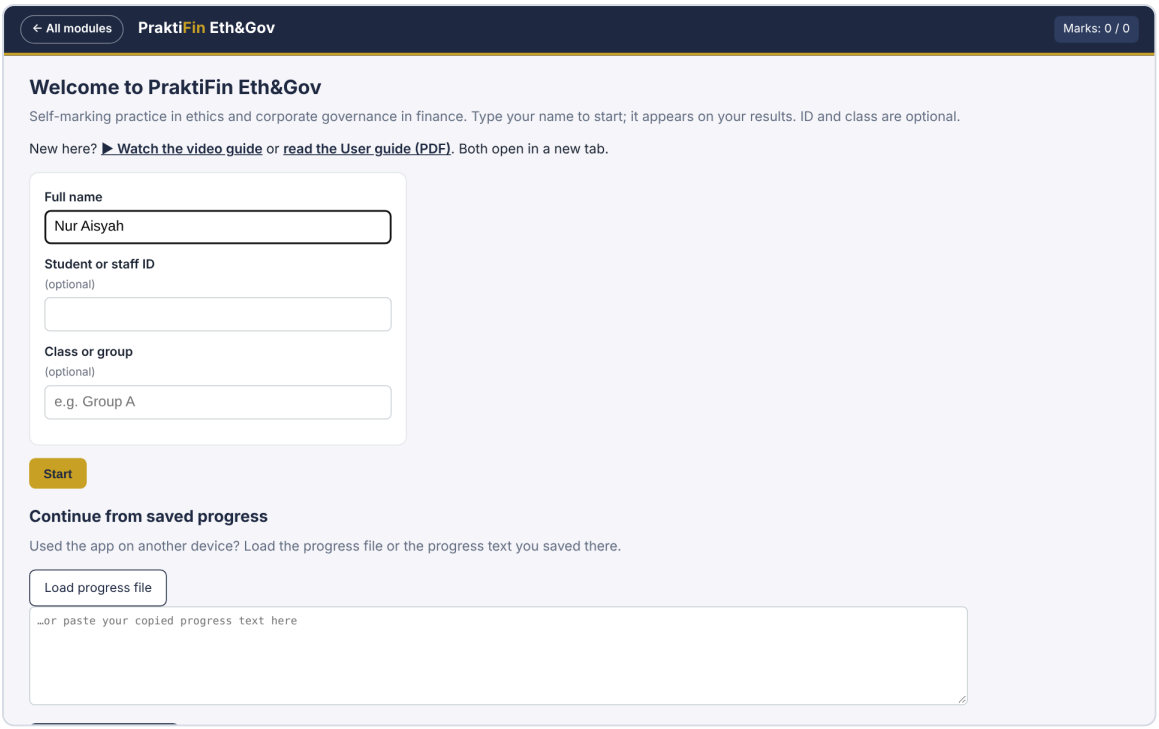

Version 1.2 · 28 November 2026
Developed by Faezah Othman (lead), Fahmi Abdul Rahim, Amirudin Mohd Nor, Nur Hafidzah Idris, Rohaiza Kamis and Mohd Hafiz Bakar, Faculty of Business and Management, UiTM Cawangan Melaka.
All companies, people and news articles in the questions are fictional.

1 · What is inside

Part of the app	What you do	Helps with
Section A · Concept Check	22 quizzes of 10 MCQ in every chapter (Understanding, Application and Lecture slides), plus unlimited "More practice" questions	Concepts, frameworks and key terms
Quick Drills	10 short drills per chapter: True/False with a reason, matching, sorting into boxes, putting steps in order	Key terms and frameworks
Section B · Case Lab	4 subtopics per chapter, each with 25 bank cases and unlimited new cases at three levels	Applying ideas to cases
Red Flag Hunt	Read a document (minutes, memo, report) and tap every problem sentence	Spotting issues in an article
Ethical dilemmas	Make decisions step by step as a person inside the case (Chapters 4 to 7)	Judgement and reasoning
Part B Essay Trainer	12 news-style article sets with 4 short-essay questions of 5 marks, plus a bonus set in a longer case-analysis format (2, 2, 6 and 10 marks)	Short-essay answers
Mock Test	30 MCQ from all chapters plus one essay set, 90 minutes	Timed practice

2 · Getting started

1. Open the link and type your **full name**. Your student ID and group are optional but your lecturer may ask for them on your results file.
2. Press **Start**. Your work is kept in this browser on this device.
3. If online saving is available, the welcome screen also shows a **PIN** box. Use your student ID and a PIN of your choice to save your progress online and continue on another device with the same ID and PIN.

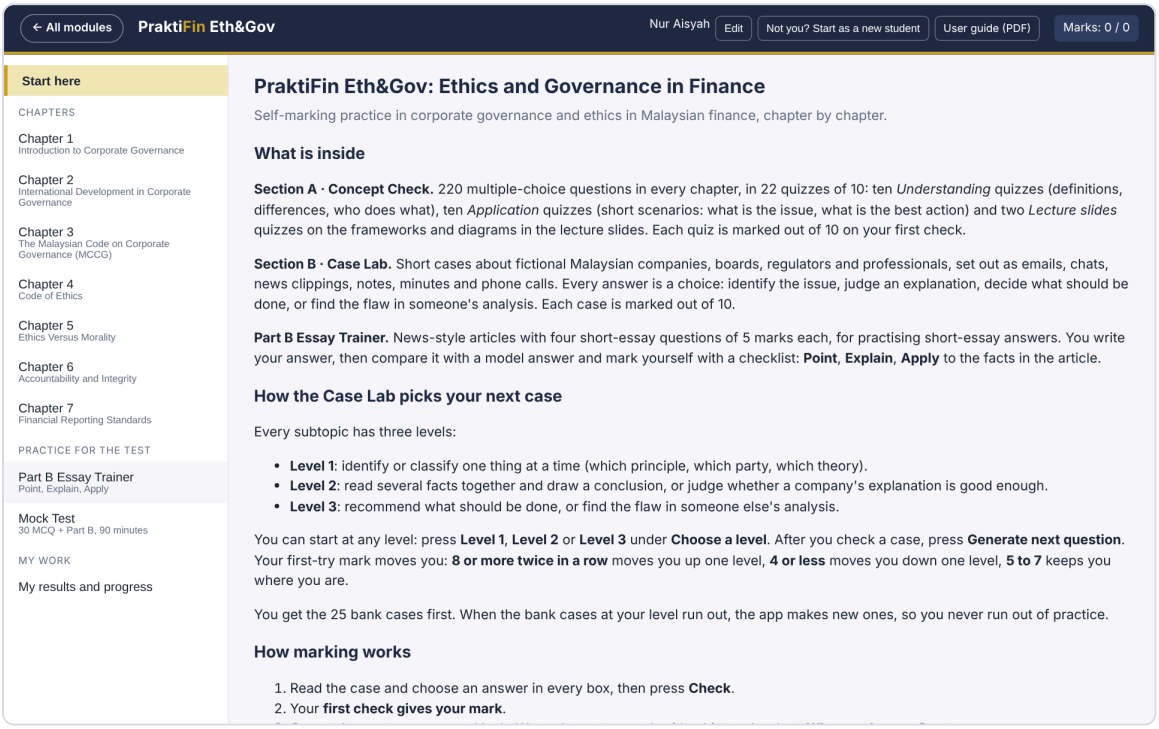

Welcome screen. "Continue from saved progress" loads a progress file you saved earlier.

> **Do not lose your work.** If you do not save online, press **Save progress** in *My results and progress* before you clear your browser or change device, then load the file on the new device.

3 · Finding your way

The left menu lists the seven chapters, then **Practice for the test** (Essay Trainer and Mock Test) and **My work**. The marks box at the top right shows your total first-try marks.

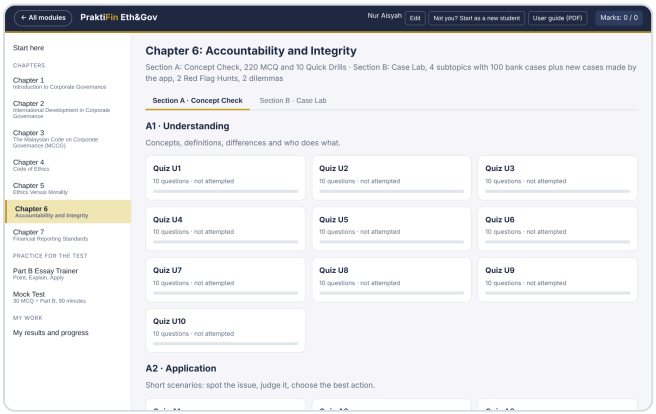

Home page with the menu on the left. On a phone the menu sits at the top.

Each chapter has two tabs: **Section A · Concept Check** and **Section B · Case Lab**.

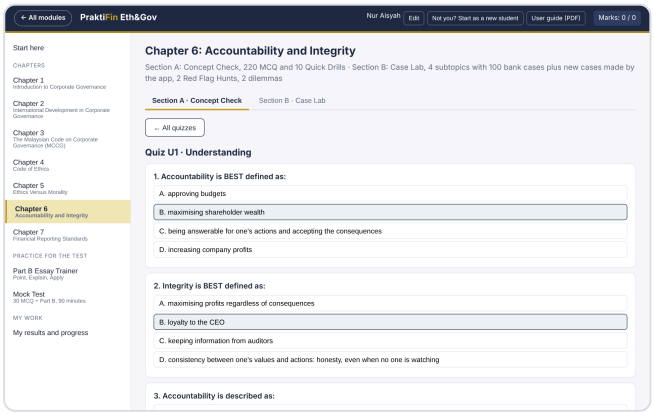

4 · Section A: quizzes, More practice and Quick Drills

Quizzes

Quizzes U1 to U10 test understanding (definitions, differences, who does what). Quizzes A1 to A10 test application (short scenarios). Quizzes S1 and S2 test the frameworks and diagrams in the lecture slides. Choose an answer for every question, then press **Check**. Your **first check** gives your mark out of 10. Each question then shows the right answer and a short explanation.

Quiz list for a chapter.

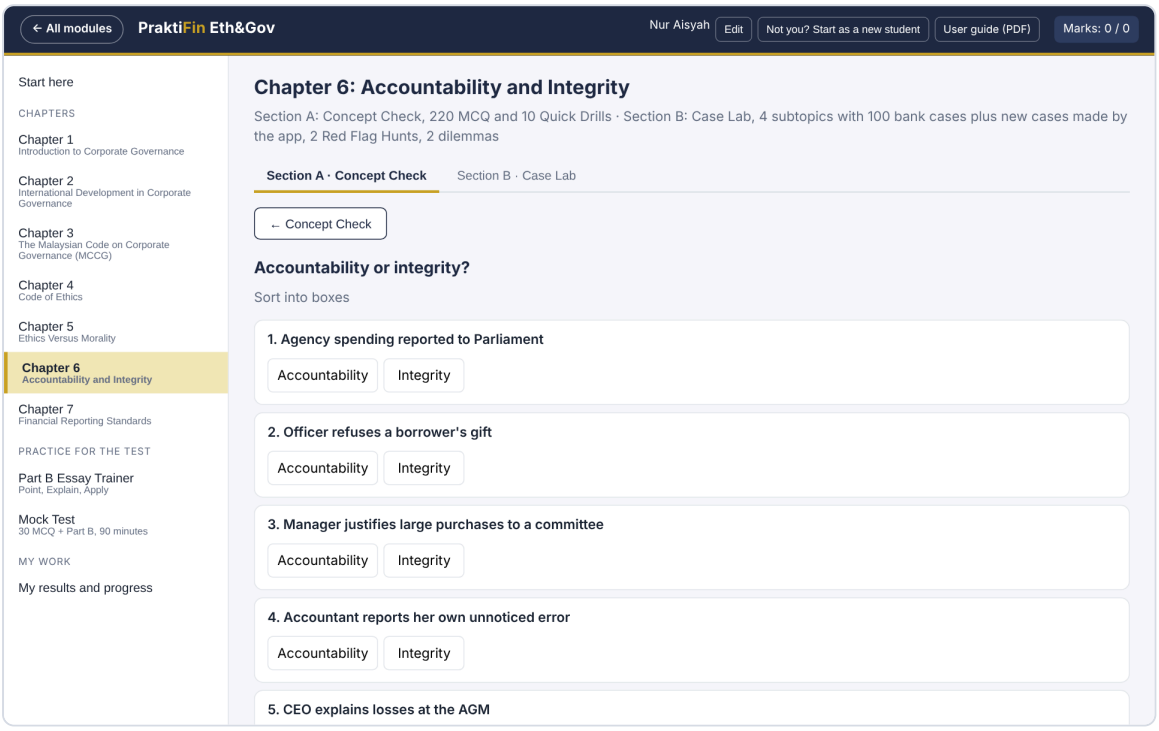

Answering a quiz.

More practice

Under the quizzes, **More practice** makes new MCQ every time, so you can keep practising after the 200 bank questions.

Quick Drills

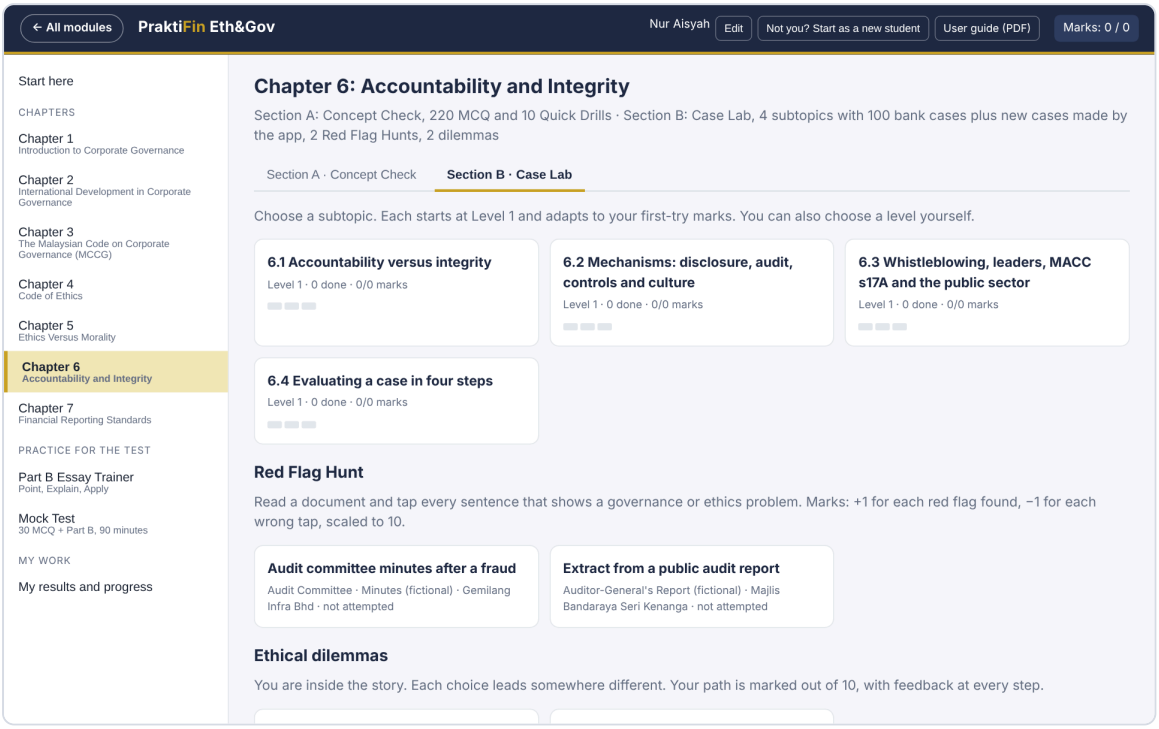

Four types: **True/False with a reason** (choose True or False, then the reason), **Match** (pair each term with its meaning), **Sort** (put each item in the right box) and **Order** (put the steps in the right sequence). Each drill is marked out of 10.

A sorting drill: accountability or integrity?

5 · Section B: the Case Lab

Every chapter has four subtopics. Each case is a short situation (an email, chat, news clipping, board minutes, a memo or a phone call) with up to four answer boxes worth 10 marks in total.

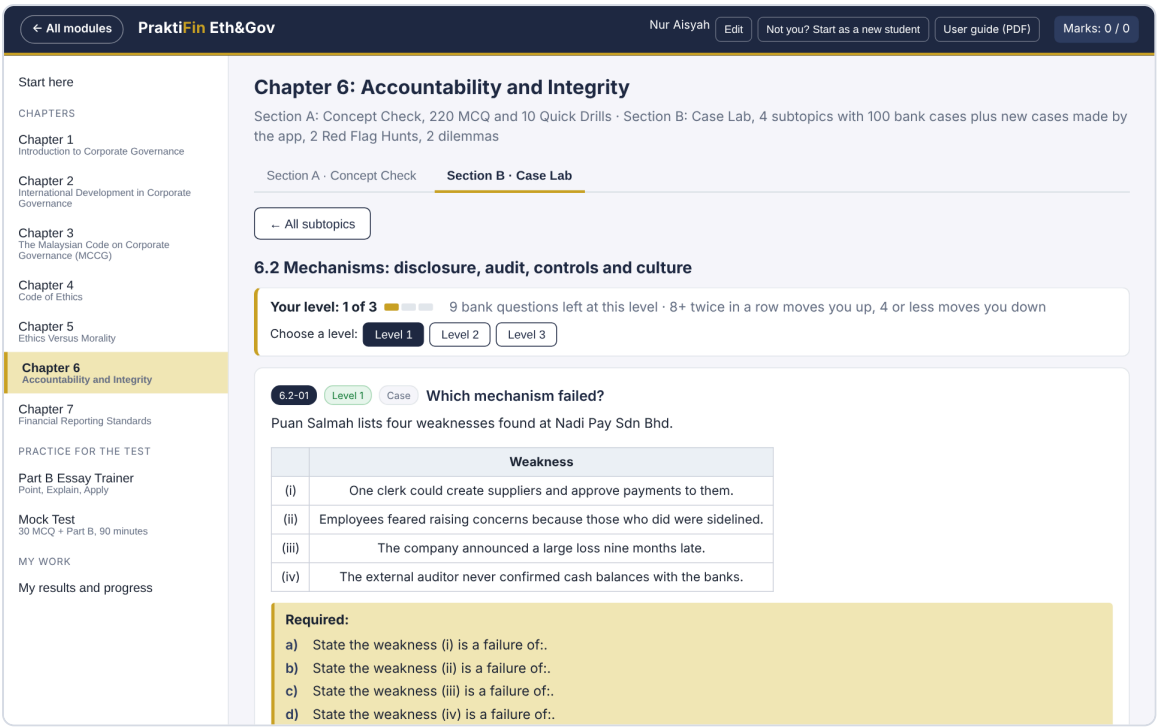

Case Lab: subtopics, Red Flag Hunts and dilemmas for Chapter 6.

Three levels

- **Level 1:** identify or classify one thing at a time.
- **Level 2:** read several facts together, draw a conclusion or judge an explanation, or decide what should be done.
- **Level 3:** find the flaw in someone's analysis, or work through a full case.

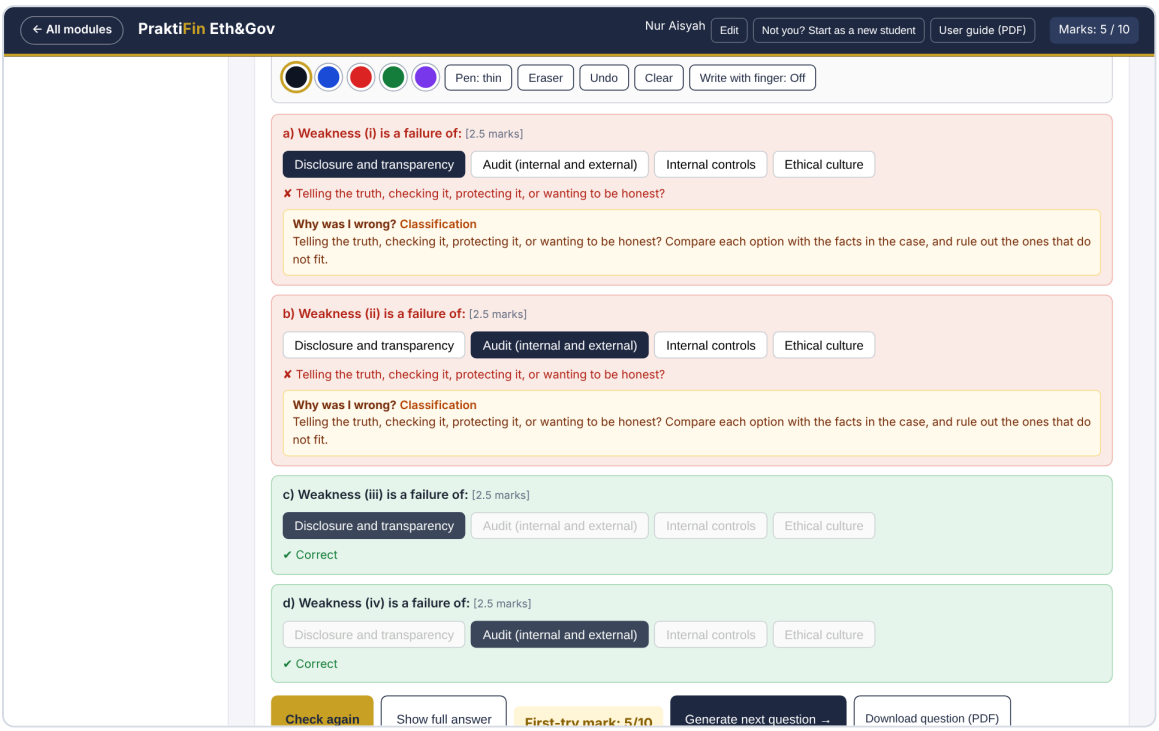

Choose a level, or let the app move you: **8 or more twice in a row** moves you up, **4 or less** moves you down. When the 25 bank cases run out, the app makes new ones.

A Level 1 case with its working paper. Use the working paper to note key facts (pen, stylus or finger).

How marking works

1. Choose an answer in every box and press **Check**. Your first check is your mark.
2. Correct boxes turn green and lock. Wrong boxes turn red with a hint and a **Why was I wrong?** note.
3. Try once more, or press **Show full answer** for the reasoning step by step.
4. Press **Generate next question** to carry on.

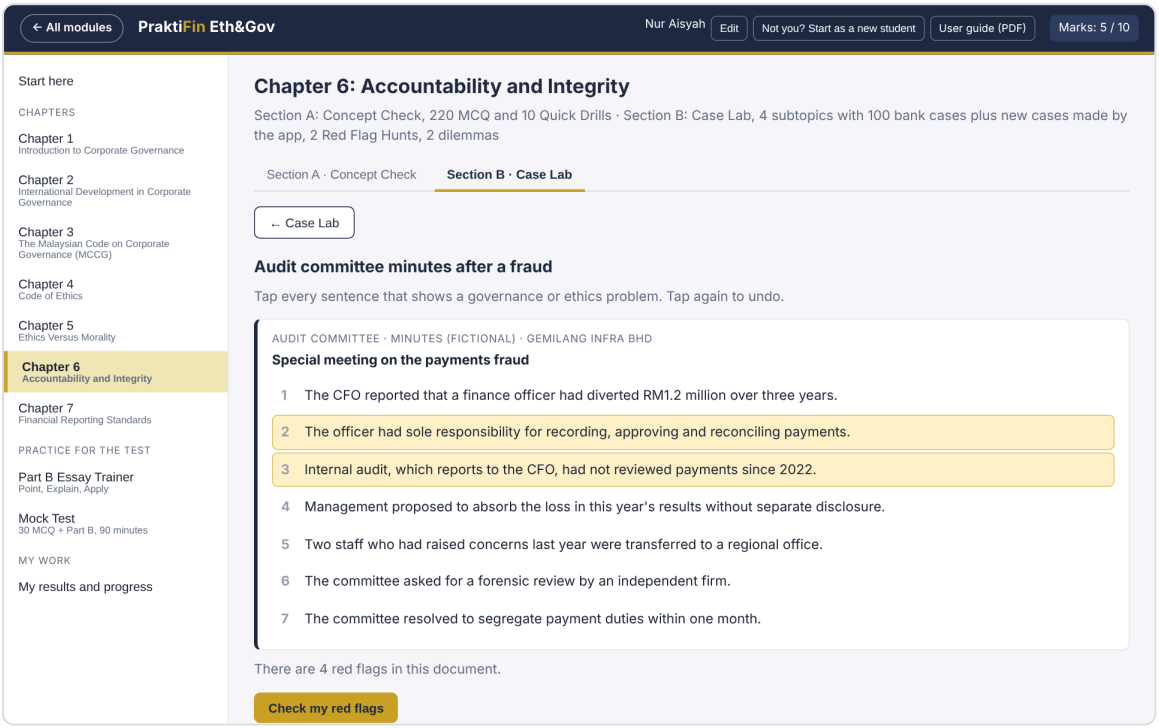

After checking: hints, the "Why was I wrong?" note and the buttons for the next step.

> **Report a problem** under each case sends your lecturer a note if you think a question is wrong.

6 · Red Flag Hunts and ethical dilemmas

Red Flag Hunt

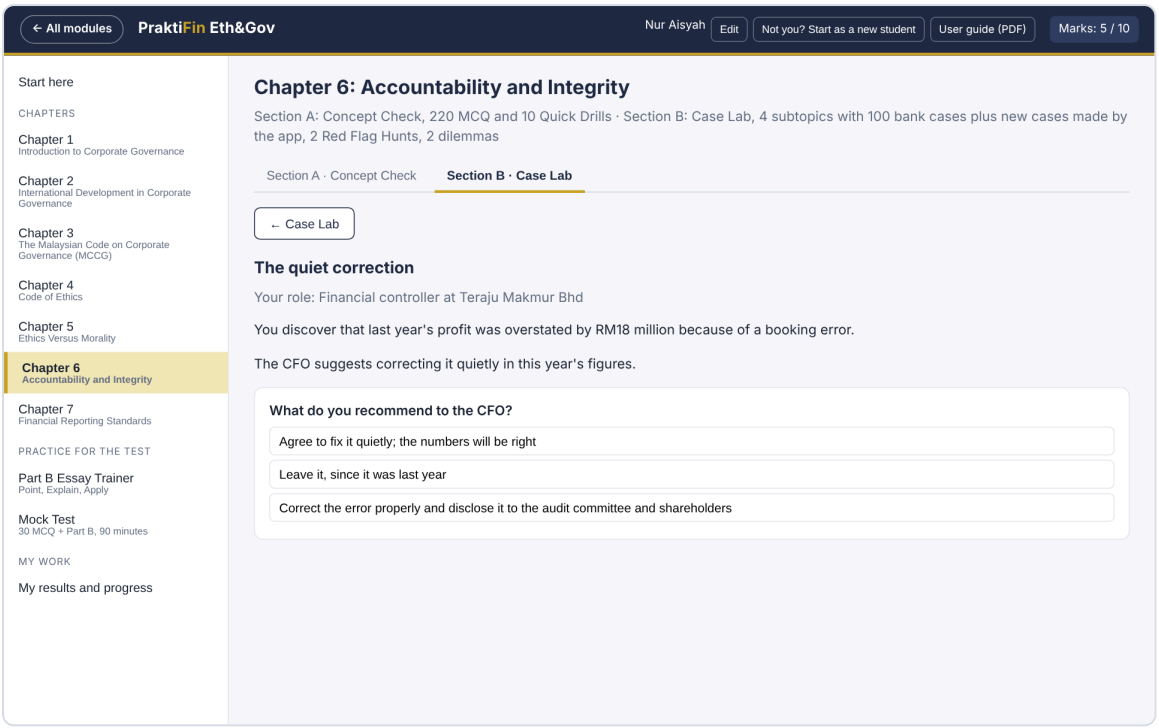

Read the document and tap every sentence that shows a governance or ethics problem. Tap again to undo. Press **Check my red flags**. You get a mark for each flag you find and lose one for each sentence wrongly tapped, scaled to 10. Each line then shows why it is or is not a red flag.

Red Flag Hunt on audit committee minutes.

Ethical dilemmas

You play a person inside the case. At each step you choose what to do, and the story follows your choice. Your path is marked out of 10, with feedback after each choice and the best path at the end.

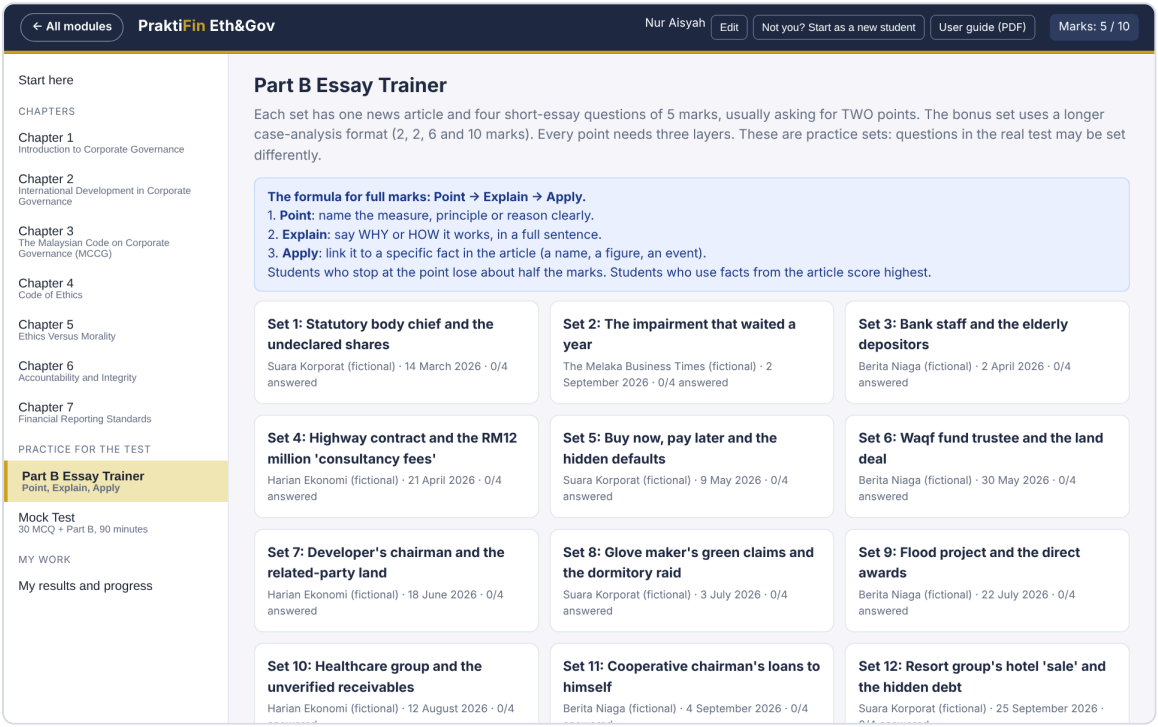

A dilemma: "The quiet correction".

7 · Part B Essay Trainer

Each practice set has a short news-style article and four short-essay questions of 5 marks. The questions cover the ideas you need for written answers:

Type of question	Typical task
Accountability and Integrity	Propose two measures, or identify two failures
Ethics Versus Morality	Ethics, morality or both?
Code of Ethics	Two principles and why they matter
Financial Reporting Standards	Two reasons, issues or measures linked to accurate reporting

These are practice sets. Questions in the real test may be set differently, and any chapter may be tested.

The 12 article sets.

The formula: Point, Explain, Apply

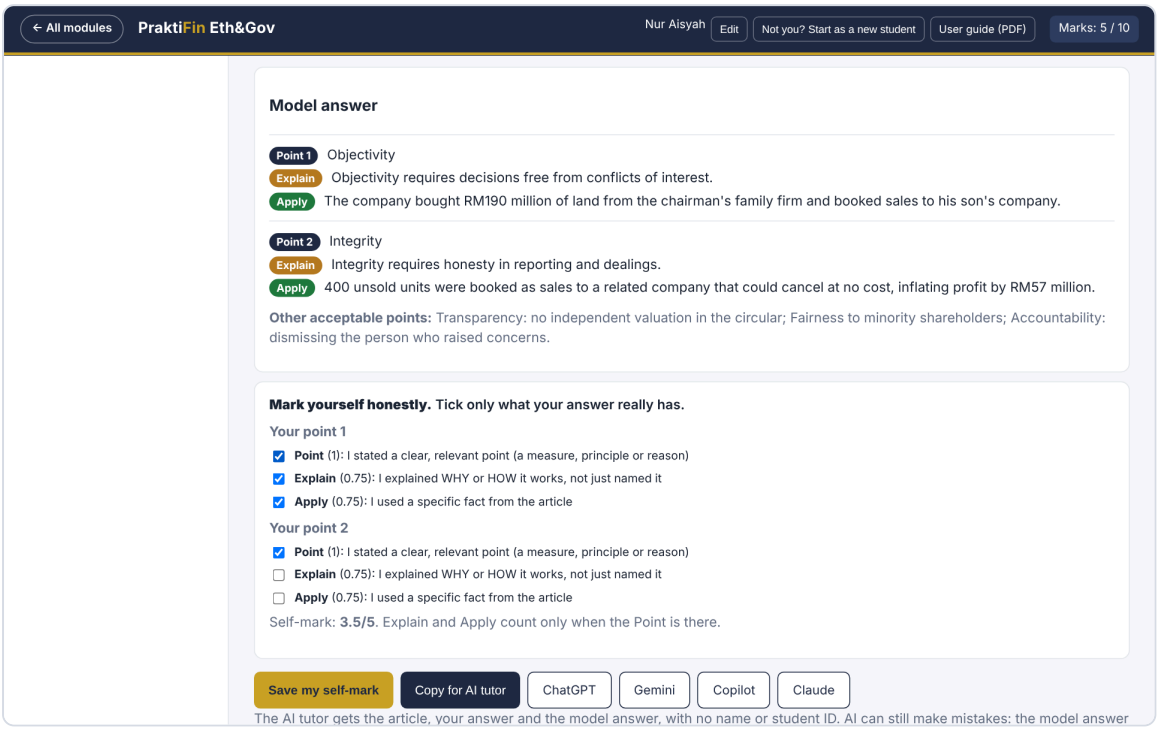

- **Point**: name the measure, principle or reason clearly.
- **Explain**: say why or how it works, in a full sentence.
- **Apply**: link it to a specific fact in the article (a name, figure or event).

The **bonus set** (Set 13) uses a longer case-analysis format: questions of 2, 2, 6 and 10 marks that ask for the issues, the effect of a law, three causes and five proposed practices. It is not used in the Mock Test.

Steps for each question

1. Read the article (tap the heading to open or close it).
2. Do the warm-up: pick the version of a weak answer that would earn the most marks.
3. Type your own answer: two points, each with Point, Explain and Apply.

4. Press **Compare with the model answer**.
5. Mark yourself honestly with the checklist: for each point, Point is worth 40 percent of the point's marks, Explain 30 percent and Apply 30 percent (for a 5-mark question with two points: 1, 0.75 and 0.75). Explain and Apply count only when the Point is there. Press **Save my self-mark**.

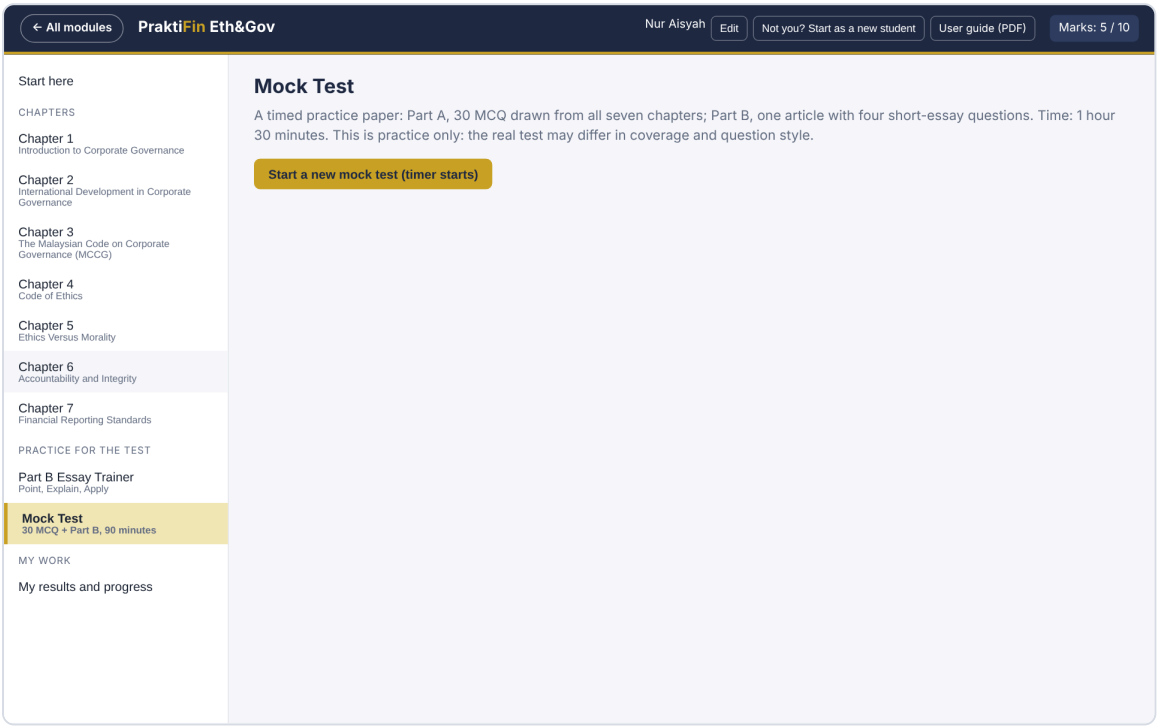

Model answer and the self-marking checklist.

> **Copy for AI tutor** copies the article, your answer and the model answer (no name or student ID) so you can paste them into ChatGPT, Gemini, Copilot or Claude for feedback. It is free and needs no account in the app. AI can make mistakes: the model answer and your lecturer decide.

8 · Mock Test

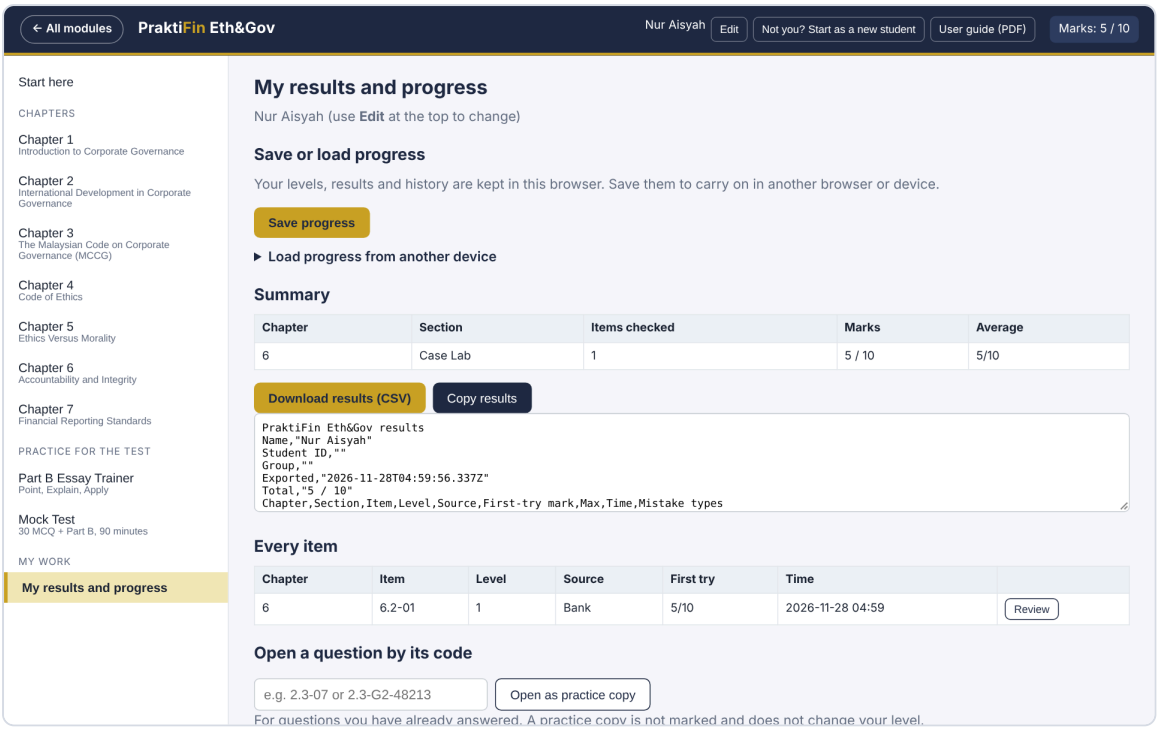

Press **Start a new mock test**. The timer runs for 90 minutes. Part A has 30 MCQ drawn from all seven chapters. Part B is one essay set. The mock is practice only: the real test may differ in coverage and question style. Part A is marked when you finish; mark Part B yourself with the checklist.

Mock Test start page.

9 · My results and progress

- **Save progress** downloads a progress file; **Load progress** brings it back on another device or browser.
- **Download results (CSV)** or **Copy results** gives your lecturer a results file with a check code, so edited files can be detected.
- The tables show marks by chapter and section, and every item you have done. Type a question code to open it again as practice.

My results and progress.

10 · Install on your phone or iPad

On Android (Chrome) use **Install app** or the menu item *Add to Home screen*. On iPhone or iPad (Safari) tap **Share**, then *Add to Home Screen*. The app then opens full screen and also works offline after the first visit.

11 · For lecturers

- **Lecturer mode** (*Enter lecturer mode* on the welcome screen) opens every question with nothing marked or recorded, for class discussion.
- **Class report** (fahmirahim0.github.io/praktifin/ethgov/report.html) reads the students' results CSV files in your browser and shows weak subtopics and common mistakes. Nothing is uploaded.
- **Class progress** (class.html) shows students who save online, using the lecturer admin key.

12 · Troubleshooting

Problem	What to do
My progress has gone	Progress is kept per browser and per web address. Use the same browser, sign in online if available, or load your saved progress file.
"This progress file has been edited"	Progress and results files carry a check code. Download a fresh file from the app.
The page looks old after an update	Reload the page once while online. The app always loads the newest version when there is a connection.
I think an answer is wrong	Press **Report a problem** under the question, or tell your lecturer the question code.
